# IntelliBreeze

“Solar Powered Attic Fan”

Exhausts attic heat drastically  
reducing energy consumption

# Intelli-Breeze

## Overview

**IntelliBreeze** Solar Powered Attic Fans are an important part of maintaining a healthy energy saving home. Proper attic ventilation helps protect your family against mold and mildew providing a safer more comfortable living space. IntelliBreeze removes heat buildup that directly impacts your homes energy costs. Reduces the load on your HVAC system which extends the life of both your A/C system and roof. IntelliBreeze has whisper quiet operation, uses 100% free energy from the sun and installs easily without the need of any electrical wiring. IntelliBreeze comes with a Lifetime Warranty and qualifies for the 30% Federal Tax Credit.

-  **Terracotta**
-  **White**

ENERGY

### SOLAR PANEL

- 30 watt high efficiency PV solar cells operate even under cloudy conditions
- High-impact tempered glass protects from hail, wind and debris

### MOTOR

- High-performance (50,000) hour motor
- Variable-speed brushless DC motor
- Whisper quiet operation

### HOUSING AND HARDWARE SYSTEMS

- UV stabilized sun resistant and long lasting Powder coated finish
- High quality Stainless Steel screws, hardware and mounting brackets
- Unique ventilation louvers eliminate the need for the use of rodent screens

### FAN BLADE

- 5-wing dynamically balanced aluminum air foil blade for maximum output
- Fan blade designed using computational fluid dynamic software for maximum airflow
- Flush mounted blade limits resistance providing increased performance and reliability

**\* Universal installation for shingle, tile, or metal roofs!**
